Introduction to R
Programming for Data
Science

SQL for Data Science with R

Data Analysis with R

Data Visualization with R

Data Science with R -
Capstone Project

Nov 19, 2024

Arsen Tagibekov

has successfully completed the online, non-credit Specialization

Applied Data Science with R

In this Specialization, learners developed foundational knowledge of the R programming language and data science packages, considered essential skills for data scientists and data analysts. The learners worked hands-on with tools like R Studio and Jupyter notebooks. The Specialization focused on the full data analysis process, including data preparation and access, statistical analysis, data visualization, and predictive models. It also involved working with relational databases and querying them with SQL and R. Learners completed a Capstone Project at the end of the Specialization to apply their new knowledge and skills to a real-world inspired data science case study.
